Retained Earnings	10.14%	9.64%	4.01%	-16.72%	

Notes:

1. Other Income has been excluded from the revenue, margin and profitability analysis as it is non-recurring and non-operational in nature. It comprises of interest income on bank deposits and current investments, dividend income from subsidiaries and non-current investments, and fair value gains on financial instruments measured at FVTPL. These items are non-operational in nature - they do not arise from HUL's core FMCG business and including them would overstate operating margins and distort period-on-period comparability. However, Other Income has been retained in the computation of Net Profit and EPS, consistent with Ind AS reporting, as Net Profit is a statutory bottom-line figure that includes all income and expenses recognised in the period.

Weighted Average Cost of Capital

	Total Cost	Total Weight
Debt Capital	5.51%	0.57%
Equity Capital	10.65%	99.43%
Weighted Average Cost of Capital ⁷		10.62%

Notes:

1. Tax Rate considered as Marginal Tax Rate for the country

2. Levered Beta is based on 2 year weekly data

3. Unlevered Beta = Levered Beta / (1 + (1 - Tax Rate) x Debt/Equity)

4. Levered Beta = Unlevered Beta * (1 + (1 - Tax Rate) x Debt/Equity)

5. Cost of debt is taken at the effective rate of interest applicable to an 'AAA' rated Company like HUL for a short term debt, net of taxes. We have considered a pre tax rate of 7.34%

6. Total Debt includes lease liabilities recognised under Ind AS 116 for all peer companies. For FMCG businesses, financial debt is minimal - borrowings predominantly reflect lease obligations on manufacturing facilities, warehouses, and distribution infrastructure. Lease liabilities have been retained in the debt calculation for consistency across peers. Beta unlevering and relevering uses total borrowings inclusive of lease liabilities; exclusion of leases would marginally increase unlevered beta estimates given the asset-light nature of FMCG operations

7. WACC is driven by cost of equity due to minimal leverage.

Calculation of ROIC	Mar-22	Mar-23	Mar-24	Mar-25
Operating Assets				
Inventories	4,096.0	4,251.0	4,022.0	4,415.0

			3 year median	11.30%
Normalized ROIC	100.00%			
Normalized Reinvestment rate	10.00%			
Normalized Growth ⁵	10.00%			

Notes:

- Intangible assets are excluded from invested capital as they primarily represent non-operating or acquisition-related balances and do not reflect incremental capital required for ongoing operations.
- Other liability items and other asset items include a mix of operating and non-operating balances. Based on the nature of FMCG operations, 65% of other assets items and 75% of other liability items have been classified as operating, representing accruals, statutory dues, and prepayments. The balance has been excluded as non-operating for the purpose of working capital and invested capital calculation.
- Loans and advances include a mix of operating advances such as supplier advances, prepaid expenses and business-related deposits, along with non-operating items. Based on their nature, 70% has been classified as operating and included in working capital, while the balance has been excluded as non-operating
- ROIC is elevated due to asset-light operations and negative working capital. For conservatism, negative working capital has been floored at zero in invested capital.
- While historical intrinsic growth ranges between ~15–18%, it is elevated due to unusually high ROIC and rising reinvestment in recent periods. For valuation purposes, growth has been normalized to 10%, derived using a sustainable ROIC of ~100% and reinvestment rate of ~10%, reflecting long-term business stability and industry maturity.
